"We have set out to be the best specialist supplier of hydraulic tube, fittings, instrumentation and pipeline materials you will ever want to deal with."

Alan Wills · Managing Director

Introduction

Hydraulic & Offshore Supplies Limited are a specialist supplier of hydraulic tube, fittings, instrumentation and pipeline materials.

We have been in operation for nearly twenty years and have established an excellent reputation based on technical knowledge, quality of product, ability to respond immediately to customer requirements and first-class service.

Whilst our initial success and ongoing growth has been centred on the Marine and Offshore industries, we have expanded our customer base to include all major end-user sectors and now supply to international companies operating throughout the world.

In addition to the very extensive and comprehensive range of product carried in stock, the company is constantly building on its unique specialist knowledge to locate non-standard items and manufacture fittings and materials to meet customers' specific needs.

As a company we have set out to be the best specialist supplier of hydraulic fittings and materials you will ever want to deal with. You may be assured this dedication to excellence will continue.

Alan Wills

Managing Director

Product range

We have geared our company to being able to supply a very wide range of high-quality materials. Our fully trained technical staff pride themselves on their ability to identify customers' specific needs and to source product from outlets throughout the world.

Standard products include:

Industrial hose

Hydraulic quality tube – carbon, stainless steel, exotic alloys

Instrumentation – full range of tubes, fittings, valves and manifolds

Compression fittings – carbon, stainless steel, single and twin ferrule

SAE, CETOP and DIN flanges – carbon, stainless steel

Stauff pipe clamps

Valves – ball, non-return, solenoid – all pressures, all materials

Hydraulic hose, fittings and assemblies – all SAE and DIN specifications up to 2" R15

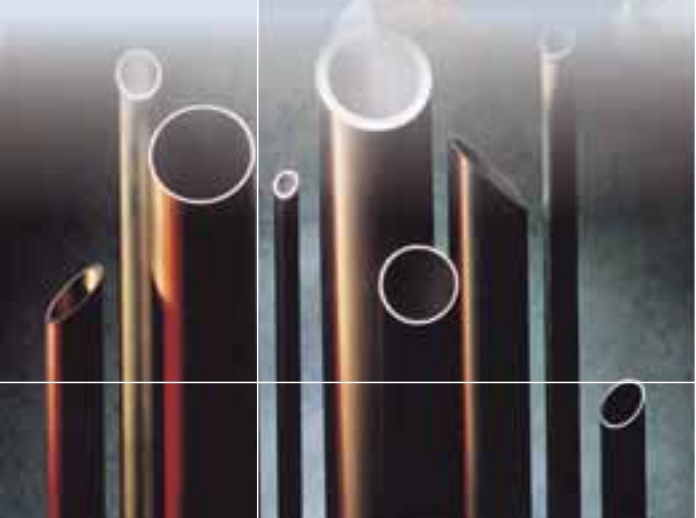

Socket weld fittings and flanges

Butt weld fittings and flanges

Pumps and motors

Pressure test and monitoring systems

Standard products

Stockholding

We are continually increasing the range of product carried in stock and have further expanded our warehouse facility to meet growing demand. Our suppliers are chosen for their ability to meet our exacting standards of quality and fast reaction time to stock and special orders.

Our stock control and despatch systems are geared to meet customers' immediate or scheduled requirements.

You can be sure that all orders placed with Hydraulic and Offshore Supplies receive the best attention at all times.

Specials

Our success in meeting customers' special needs has been developed over many years and is based on our unique specialist hydraulic knowledge and expertise. We have links with suppliers worldwide and have generated a line of communication which enables our technical staff to locate sources of supply speedily and to respond to

enquiries with the utmost care and attention.

With the ever-increasing demand by customers for non-standard materials we are totally committed to this sector of the business.

Your 'specials' are our speciality.

Manufacturing

During the last two years we have expanded our facility to manufacture and assemble product both on site and through our specialist suppliers. This now represents a very important part of the overall service we offer to our customers and we welcome the opportunity to quote for non-standard items manufactured to meet customers' specific requirements.

Quality

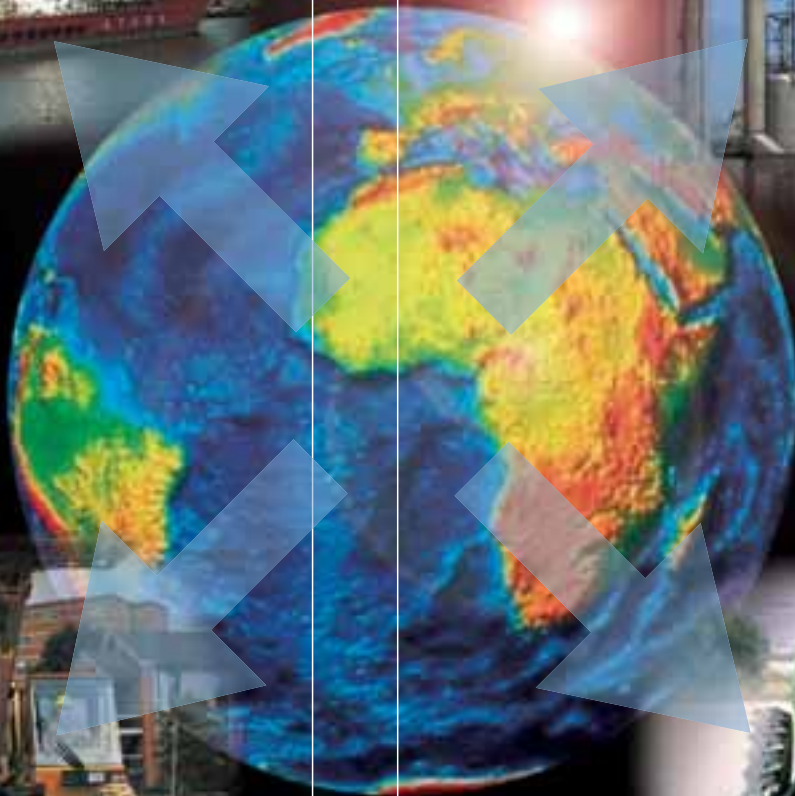

Quality of product and service is constantly monitored to ensure that we meet customers' exact requirements. Our policy as a company is to grow our business based on our reputation as a first-class specialist supplier of hydraulic fittings and materials. We are extremely proud of our achievement and are totally committed to excellence

throughout all aspects of our business.

Test certification can be supplied with all appropriate materials. Certificates are kept on file, providing full traceability. Witness testing to your specific requirements can be arranged through authorised testing bodies such as Lloyds, DNV or ABS.

Markets

Hydraulic & Offshore Supplies markets a full range of hydraulic tubes, valves, fittings and materials to international companies operating throughout the world.

End user market sectors include: shipbuilding, ship repair and conversion, marine, offshore fabrication, public utilities, OEM, construction, energy process,

petrochemical, agricultural and general engineering industries.

We are ideally located to air-freight or sea-freight materials to all four corners of the world. Our Export Department is geared to responding rapidly to enquiries and excels itself in getting materials delivered on time every time to our overseas customers.
